Dear Ms. Pugh:

Re: Small Mine Notice of Intent, Cedarstrom Calcite Mine, SM/047/012

This letter is being sent for two reasons. The first is to inform you that the Larson's Brothers Limestone Quarry has submitted a Small Mine Notice of Intent for limited blasting and drilling in the old quarry. After these portions of the quarry are mined out, soil will be placed on the pad areas and seeded. I hope that this will ease some of your concerns with regard to eventual reclamation of the site.

The second reason for this letter is with regard to the Cedarstrom Calcite Mine. All active mine operations except for the mining of sand, gravel and unconsolidated rock aggregate are required to reclaim when mining has been completed. Small mine operations which are less than five acres in size such as the calcite mine do not require bonding, but do require the filing of a Small Mine Notice of Intent. This notice is basically a written commitment to reclaim the site upon conclusion of mining.

Structures, roads, powerlines, etc. which have a legitimate post mining use do not have to be reclaimed. Variances for reclamation of portions of a mine site are provided for in the form and should be requested if appropriate.

A Small Mine Notice of Intent has been enclosed for your use or for the operator of the mine if you are leasing the property to another person or company. My staff would happy to meet with you on site if you have any questions or concerns with regard to reclamation.

Thank you for your cooperation.

Sincerely,

Lowell Braxton  
Administrator, Mineral Resource  
Development and Reclamation Program

Dear Ms. Pugh:

Re: Small Mine Notice of Intent, Underground Calcite Mine, Utah  
County, Utah

Attached is a Small Mine Notice of Intent which you should complete and return. Please call me if you should have any questions.

Sincerely,

Frank Filas  
Reclamation Engineer
